

SENTRY

SENTRY is a single point alarm package that can be utilized as a leak detection system, or as a high or low level alarm unit.

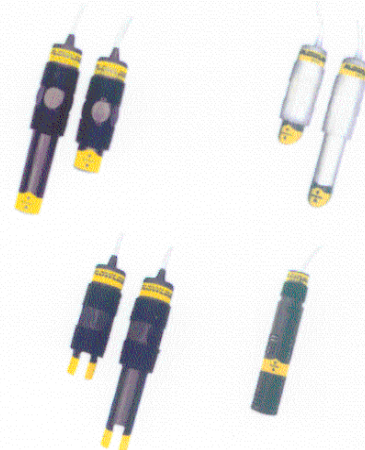

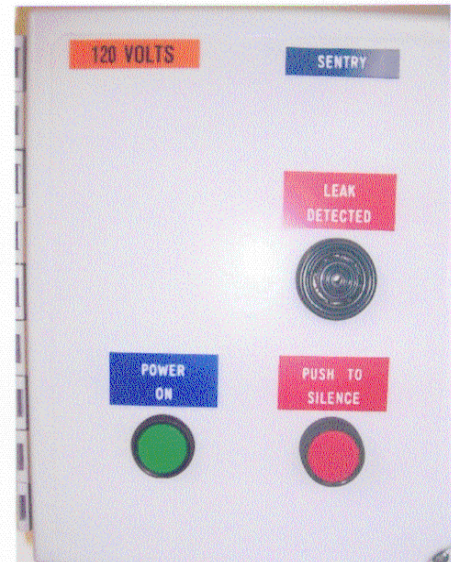

SENTRY is designed to work with any two, three, or four wire single point sensor, and provides the power for the sensor.

Sensors are available in Polypropylene, PVDF, or PFA Teflon

Sensor technologies available are:

- Ultrasonic Gap
- RF Capacitance
- Optic
- Buoyancy

SENTRY is available with sensors for a complete package, or separately for use with customer supplied sensors.
