

On Delay Solid State Timer

MCS

Specifications

Electrical Input Voltage: 24 to 240V, ±10%

Frequency: AC - 50/60Hz DC - Filtered to Full Wave Time Delays: Type: Adjustable, Factory Fixed or RemoteWeight: 4 Oz. Range: 100 Milliseconds to 5 Minutes Repeat Accuracy: ±1% with Fixed Conditions Fixed Time Accuracy: ±20% worst Case Reset Times: During Timing: 50 Milliseconds, Typical After Timing: 5 Milliseconds, Typical Protection: Varistor and/or R-C Network Power Consumption: 5VA Output Ratings: Type: Solid State Form: One Normally Open (1NO, Form A) For adjustment codes 3 & 4 a jumper or Non-Isolated Rating: 1 Amp Continuous @ 25°C Resistive: 100%PF Inductive: 75-80%PF 15 Amps Inrush, Non-repetitive 30 mAmps to ensure Turn-on Operations: 100,000 Cycles*

* Cycles were selected to satisfy minimum testing at UL.

Input Voltages

24D - 24VDC

24A - 24VAC

120A - 120VAC

240A - 240VAC

Ordering Information

R-K Model

Mounting: Surface, #6 Screws Termination: Screw or .25" Push-On Tabs Packaging: Epoxy Filled

Ambient Temperatures

Operating: 0°C to 65°C UL Operating: 0°C to 40°C Storage: -30°C to 85°C

Notes:

MCS - 120A - 3 S - (Fixed Time)

Remote Timing Resistors - multiples of 2.7 megohms will increase the time delay by 1 minute ±20%.

resistor must be installed across terminals 3 and 4 to allow the timer to time out.

> Termination S - Screw Terminals

Adjustments

1 - Fixed Internally

internal pot

(Specify time in sec.)

Adjustable .1 to 45 sec.

with remote resistor and

with internal pot. Adjustable .1 to 300 sec.

4 - Remote timing resistor

T - .25" Push-On Tabs

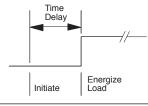

- 1 Amp Output, 1NO
- Indicating LED
- Fixed or Adjustable **Delays**
- Screw Terminals or **Push-On Tabs**
- Voltages from 24 to 240VAC
- **Epoxy Filled**

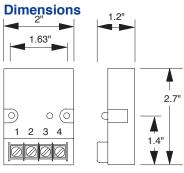

Operation

On Delay

When input power is applied to the MCS, the timing cycle begins. At the end of the timed period the load is energized. When input power is removed, the timing circuit is reset and the load is de-energized.

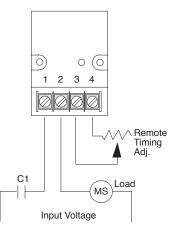

Connections The MCS operates with the Load in series with the timer. A Load must always be connected in series with the MCS to avoid damage.

MS = Load (Motor Starter) C1 = Control Contact

DIN Rail Bracket #DRB-2
