

EM-SERIES Low Flow Magnetic Meter

EM100/102
Pulse +/- 4-20 mA Output Only
No Display

EM101
Pulse Output
4-20 mA
High & Low Alarm
Rate & Total Display

FEATURES

- Compact
- Chemically-resistant
- Output options include pulse, analog, high and low alarm
- Compatible with diaphragm pumps

APPLICATIONS

- Low flow metering
- Chemical injection
- Fertigation

GENERAL INFORMATION

The EM-Series are small electromagnetic low-flow flowmeters with chemically-resistant plastic wetted parts and a choice of Hastelloy or platinum electrodes suitable for use with a variety of chemicals. Capable of measuring pulsating flows from diaphragm-type metering pumps, they are designed primarily for electrically-conductive chemical injection applications. The 1/4", 3/8", and 1/2" sizes monitor maximum flows of 1, 3, and 8 gallons per minute (or 4, 11, and 30 L/min), respectively. Barb or NPT fittings available.

The EM100 and EM102 are 12-24 Vdc powered. The EM100 comes with a standard pulse output, and the EM102

with standard pulse and analog outputs. All electronics are self-contained in a single compact chemically-resistant housing, well suited for OEM applications. These meters are also appropriate for remote monitoring of chemical volume or rate using a computer or a PLC.

The EM101 is 115 Vac, 60 Hz powered and includes a rate and total display as well as a variety of outputs. For continuous transmission of a flow signal, there is a 4-20 mA output, a 0-5 volt signal, and a frequency signal proportional to flow. In addition, there are relay alarm outputs for user-set low and high flow levels.

FEATURES

EM100/102
Meter only, no display
No mounting bracket
Single 6 foot control cable
