Stacklights

- Fast mounting of signal elements using bayonet fixing
- Easy changing of bulbs for each module without tools
- Up to 10 light elements possible with 2-sided mounting bracket
- Flexibility of signal element combination
- Flashing light elements can be mounted in each module
- Up to 5 flashing light elements possible
- High protection rating optical and audible signal elements with IP 54, UL Type 2, 5
- LED elements for long life

Signal beacons

- Rugged construction
- High protection rating IP 65, UL Type 2, 5, NEMA 4X
- Cap consists of high impact polycarbonate (up to 15 sq. ft.).
- Bulb change via inside of control box
- Available with LED bulbs.

Simple mounting with quick fix system

Each module is equipped with bayonet mounting with an integral contact system. The modules are fastened together by aligning the corresponding white marks; with a gentle twist, they are locked into place.

Cleaning

Clean the product from the outside with a light, non-scouring cleaning agent. Never use abrasive or diluting agents and never use benzene.

Signal beacons

Features

- Vandal-proof construction withstands every mechanical and natural challenge both indoors and outdoors
- High protection rating IP65
- Cap consists of high impact polycarbonate (up to 20J).
- Bulb change can be accomplished in seconds through lamp holder with bayonet

Function

Signal beacons produce visible (blinking, flashing or permanent light) or audible signals (buzzer, siren) via electrical signals. Signal beacons are approved according to EN 60598 / VDE 0711 T1.

Safety instructions

- Wiring must be installed by a qualified electrician.
- Turn off the power supply before connecting the signal beacon
- Only operate signal beacons when completely assembled.
- Observe the correct nominal voltage.
- The volume of signal element can cause damage to hearing when used at close quarters

Technical specifications

- Dimensions: 68mm x 96.5mm (diameter x height)
- Housing: PC/ABS-blend, high impact, black
- Cap: Polycarbonate, transparent; shock resistance 20J according to EN 50014
- Mounting: Drilled hole \varnothing 37mm (PG 29)
- Terminal: Screw, M3; Pull relief; Flex radial or axial laid; Contact - voltage proof according to VDE

Permanent light

- Operating voltage: 12 - 240V
- Bulb socket: B15d, 10 W max.
- Bulb change: Bayonet
- Current consumption: depends on bulb (bulb not included with assembly)
- Starting current: depends on bulb (bulb not included with assembly)

LED Model

- Permanent light: 24 VAC/VDC; 115VAC; 230VAC
- Blinking light: 24 VAC/VDC; blink frequency ca. 1 Hz
- Rotating light: 24 VAC/VDC; rotation frequency ca. 120 U/min
- Current consumption:
 - 24VDC: Permanent light, 60mA; Blinking light, 40mA; Rotating light, 70mA
 - 115VAC: 30mA
 - 230VAC: 30mA
- Starting current: <500mA

Flashing light

- Flash frequency: ca. 1 Hz
- Flash energy: 2W
- Operating voltage: 12VDC, 24VDC, 115VAC, 230VAC
- Current consumption:
 - 12VDC: 200mA
 - 24VDC: 125mA
 - 115VAC: 20mA
 - 230VAC: 15mA
- Starting current
 - 24VDC: <0.5A
 - 115VAC: <0.5A
 - 230VAC: <0.25A

Bulbs

- 12V, 7W
- 24V, 7W
- 115V, 7W
- 230V, 7W

Technical data

Signal tower with AS-interface element

Description

Signal towers KombiSIGN 50 and 70 with AS-interface element are capable of total communication: By simple integration of an AS-interface element, the actuators are connected to the networking system actuator-sensor interface; this considerably reduces complex wiring. This element is to be mounted as the lowermost element in the signal tower just like a light element.

Technical specifications

Item	AS-Interface element	AS-Interface element with additional external voltage
Dimensions	KS70: 67mm x 67mm	KS50: 52mm x 67mm
Number of signal elements	4	4
Type of signal elements	Flashing light element LED element Buzzer element Siren element (The total consumption of the single elements must not exceed 200 mA)	Permanent light element Flashing light element ① LED element Buzzer element Siren element ①
IO-Code	8	8
ID-Code	F	F

Terminals	4, electronic	4, relays
On-load voltage	through bus conduction	additional external voltage: 10V – 120V = ① 10V – 30V = ② 10V – 230V –
Current carrying cap. Σ I _{max}	200mA	1.5A
Short current/overload protection	integrated	fuse M 1.6A
Working temperature	-20° – +50°C	-20°C – +50°C
Protection rating	IP 54	IP 54

① Valid for KombiSIGN 70

② Valid for KombiSIGN 50

Technical data

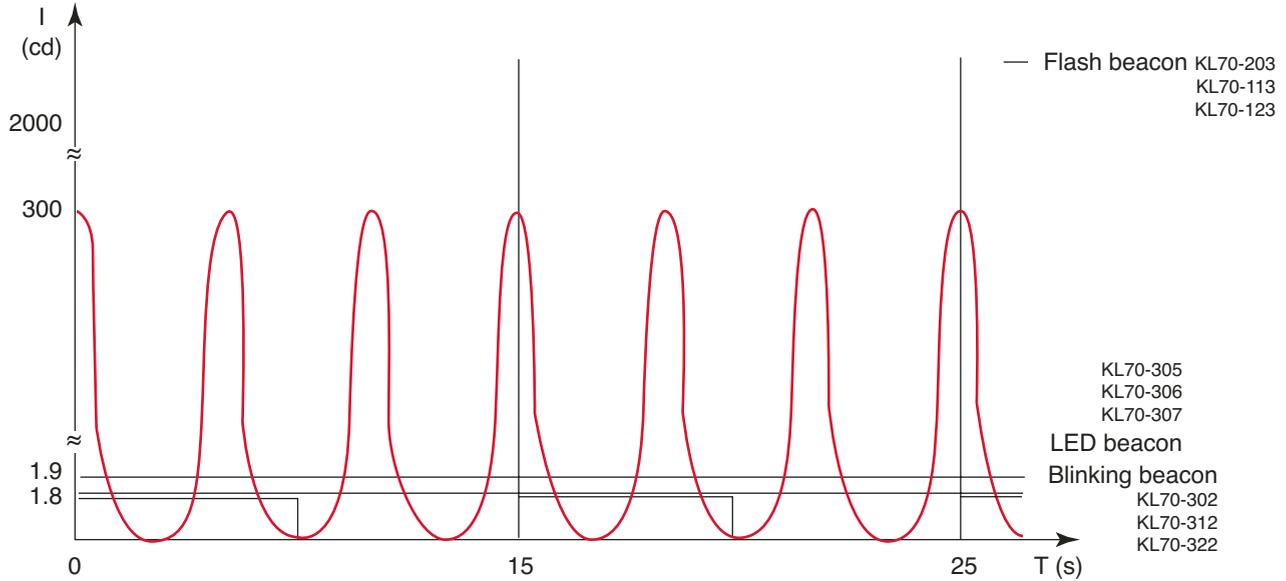

Signal beacons & stacklights

Light intensity of LED

Details pertaining to beacons with LED are based on a standing from December, 1999. Component-related improvements are continually developing; please inquire as to the current light intensity should the need arise.

Light intensity of beacons with bulbs

Light intensity pertains to the bulbs used by ABB; the use of other bulbs may lead to discrepancies.

Optical signals

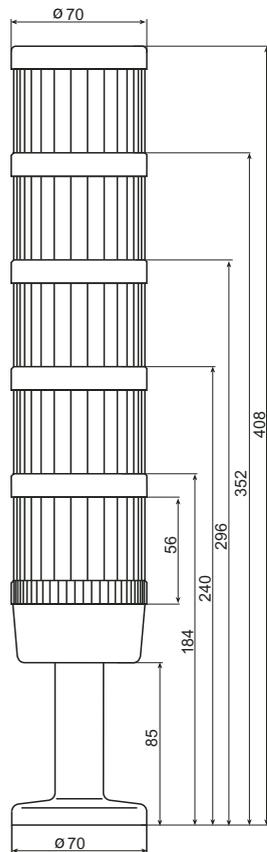

Signal tone	Meaning
Red	Extreme danger hazardous conditions
Yellow	Beware / dangerous conditions imminent
Green	Normal conditions
Blue	Conditions requiring defined action
White / Clear	No particular meaning

Audible signals

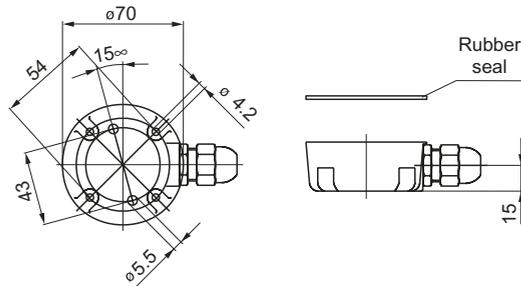

Signal tone	Meaning
Multi-tone Scale in differing frequencies (various high/low frequencies) with regular, cyclical intervals	Extreme danger Immediate action
Two-tone Scale in differing frequencies (one high, one low frequency) with regular, cyclical intervals	Extreme danger Immediate action
Modulated tone Permanent tone with graduated decrease and increase of sound frequencies	Danger Immediate action
Intermittent tone Regular intervals between on and off-cycle	Danger Immediate action
Linear tone Permanent tone in specific frequency	Safety
