

The J/RJ Series

J

The J Series enclosures follow the original design of fiberglass enclosure products featuring a modest overhang cover on a flange mounted base. This simple but elegant concept offers unobstructed side-walls, built in mounting capabilities and the strength characteristics associated with a protective wrap around cover that is hinged, latched or screwed down.

Stahlin's J series enclosures are designed for general electrical and electronic applications and any application that has associated environmental concerns. Simple in its design, the enclosure can be configured with cutouts, windows and modifications that make your finished product truly unique.

J series products enhance any instrument installation. They accommodate standard back panel mounting but offer a range of panels, including an elevated dead front panel that is highly visible through a cover mounted window.

If extra depth is required, the series offers a "raised cover" that increases depth by adding to the depth of the cover. This feature can be particularly effective with cover mounted components. There is a multitude of variations available in this simple but elegant design.

J/RJ Series Attributes

- Available in 3 cover options on certain size enclosures:
 1. Opaque Cover
 2. Flush Bonded Window
 3. Clear Polycarbonate Cover
- Overhang cover on smooth sided base
- High temperature, flame retardant, non-corrosive
- All stainless hardware latches and screws
- Full length stainless steel hinge
- Chemically resistant fiberglass reinforced polyester
- Submersible, non corrosive, environmental designs
- Stainless steel retention chain on screw covers
- Continuous polyurethane gasket

Technical Specifications - RJ Series

RJ

Raised Cover "W" configuration - 4 cover screws, lift off cover

W Construction

Material	Hot compression molded fiberglass reinforced polyester
Gasket	Poured polyurethane seamless gasket provides watertight, dust-tight environmental seal
Pan head screws	Minimizes protruding surfaces
Stainless Steel Hardware	300 Series stainless used on all external hardware
Molded in Mounting Flange	Integral flange molded in place for ease of mounting
Mounting Bosses	Panel mounting capability for fixed rear panel
Metal inserts	Back panel utilizes threaded brass inserts accepting 10-32 screws
Soft Edge Design	Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
Cover retention chain	Stainless steel beaded chain for securing cover after lift off
Raised Cover	Extended depth in cover

Flush Bonded Window "HPL" configuration - Hinged, padlock latch

HPL Construction

Material	Hot compression molded fiberglass reinforced polyester
Gasket	Poured polyurethane seamless gasket provides watertight, dust-tight environmental seal
Stainless Steel Hardware	300 Series stainless used on all external hardware
Molded in Mounting Flange	Integral flange molded in place for ease of mounting
Mounting Bosses	Panel mounting capability for fixed rear panel
Metal Inserts	Back panel utilizes threaded brass inserts accepting 10-32 screws
Bonded Window	Precision routed flush bonded Super Abrasion Resistant acrylic material for maximum visibility
Raised Cover	Extended depth in cover

Industry's unique requirement for extra deep enclosure without significantly increasing the length and width of the enclosure is met with Stahlin's extra deep Fatboy series.

The Fatboy series is a clam shell style enclosure, noted by near equidistant capacity in both the cover and base. The series employs a flange mount base for ease of installation, a stainless steel full length hinge and stainless steel securing latch. Door clearance to the installed equipment must be considered when specifying this enclosure.

The demands for cover mounted components such as DIN facings or multiple contact pushbuttons are met with ample depth from the cover or with substantial height for panel mounted components.

Fatboy Series Attributes

- Available in 2 cover options:
 1. Opaque Cover
 2. Flush Bonded Window
- Clam shell design, opening from the middle of the enclosure
- All stainless latches and hardware
- Memory retaining polyurethane gasket between cover and bases
- Full length stainless steel hinge
- Chemically resistant fiberglass reinforced polyester
- Integral mounting flange

SSH Construction

Material	Hot compression molded fiberglass reinforced polyester (thermoset)
Gasket	Poured polyurethane seamless gasket provides watertight, dust-tight environmental seal
Pan head screws	Minimized protruding surfaces
Stainless Steel Hardware	300 Series stainless used on all external hardware
Molded in Mounting Flange	Molded in flange for ease of mounting.
Mounting Bosses	Panel mounting capability for fixed rear panel
Metal inserts	Back panel utilizes threaded brass inserts accepting 10-32 screws
Soft Edge Design	Rounded edges, minimal protrusions or exposed pocket areas for assembly of dust and debris
