#### **AS-Interface Master Module** MicroSmart

# Capable of Connecting 62 Slaves

- Compliance with AS-Interface Ver. 2.1 specifications
- Digital and analog slaves can be connected.
- · Configuration and slave monitoring can be done using LED indicators and pushbuttons on the front panel as well as using WindLDR.
- Analog signals can also be processed using built-in analog voltage input terminal or optional analog I/O modules.
- · IEC62026-2 compliant.

AS-Interface Master Module

# Part Numbers

# Part Number FC4A-AS62M

**Programming and Monitoring Software** Part Number WindLDR FC9Y-LP2CDW

# MicroSmart Pentra CPU

#### All-In-One Type

All dimensions in mm.

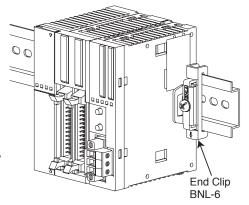

Canada: 888-317-IDEC 249

**Automation Software** 

#### **Installation Location**

- MicroSmart modules must be installed correctly for optimum performance.
- MicroSmart is designed for installation in a cabinet. Do not install the MicroSmart outside a cabinet.
- The environment for using the MicroSmart is "Pollution degree 2." Use the MicroSmart in environments of pollution degree 2 (according to IEC60664-1).
- Make sure that the operating temperature does not drop below 0°C or exceed 55°C. If the temperature does exceed 55°C, use a fan or cooler.
- Mount the MicroSmart on a vertical plane as shown at right.
- To eliminate excessive temperature build-up, provide ample ventilation. Do not install the MicroSmart near, and especially above, any device which generates considerable heat, such as a heater, transformer, or large-capacity resistor. Relative humidity should be above 30% and below 95%.
- MicroSmart should not be exposed to excessive dust, dirt, salt, direct sunlight, vibrations, or shocks. Do not use the MicroSmart in an area where corrosive chemicals or flammable gases are present. The modules should not be exposed to chemical, oil, or water splashes.

#### **Cable Connection**

- **Caution:** Make sure that operating conditions are within the specification values.
  - Connect ground terminal of the CPU module to a proper ground, otherwise electric shock may occur.
  - Do not touch live terminals, otherwise electric shock may occur.
  - Applicable ferrules, crimping tool and screwdriver are listed below.
  - When connecting stranded wire or multiple wires to a screw terminal block, use a ferrule.

#### Ferrules for Terminal Block

Cross-section 0.5mm<sup>2</sup> (20AWG)

For 1-cable connection: Al 0.5-8 WH

For 2-cable connection: Al-TWIN 2 x 0.5-8 WH

Cross-section 0.75mm<sup>2</sup> (18AWG)

For 1-cable connection: AI 0.75-8 WH

For 2-cable connection: Al-TWIN 2 x 0.75-8 GY

Cross-section 1.5mm<sup>2</sup> (16AWG)

For 1-cable connection: Al 1,5-8 BK

Recommended ferrules shown above are made by Phoenix Contact.

# **Crimping Tool**

CRIMPFOX ZA 3 (Phoenix Contact)

#### Screwdriver

SZS 0.6x3.5 (Phoenix Contact)

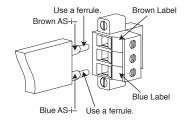

#### **Screw Tightening Torque**

AS-Interface connector terminal screws: 0.5 to 0.6 N • m AS-Interface connector mounting screws: 0.3 to 0.5 N • m

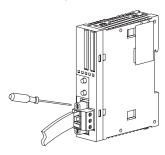

# **AS-Interface Cable Wiring**

Before wiring the AS-Interface cable, remove the AS-Interface cable terminal block from the AS-Interface cable connector on the AS-Interface master module.

AS-Interface specifies use of brown cables for the AS-Interface + line, and blue cables for the AS-Interface - line. Connect the cables according the colors indicated on the terminal block. Tighten the terminal screws to a torque of 0.5 to 0.6 Nom (Replacement terminal block: FC4A-PMT3PN02, package quantity: 2)

Insert the terminal block to the connector on the AS-Interface master module, and tighten the mounting screws to a torque of 0.3 to 0.5 Nom.

# **PS2R AS-Interface Power Supply**

# **AS-Interface Power Supply with Universal AC Input Voltage**

- Input voltage range: 100 to 240V AC
- Two output ratings: 73W and 145W
- Slim housing style mountable on DIN rails
- IP20 finger-safe terminals
- CE marked (LVD, EMCD)
- UL listed (UL 508), CSA (C22.2 No. 950), TÜV (EN60950, EN61010-1)
- Noise standards EN55022, EN61000-6-2 compliant
- Input indicator (orange) and output indicator (green)
- IEC62026-2 compliant

# **Part Numbers**

# **AS-Interface Power Supply**

<sup>1.</sup> The AS-Interface power supply is provided with an overvoltage protection circuit, but a long period of overload and short-circuit should be avoided.

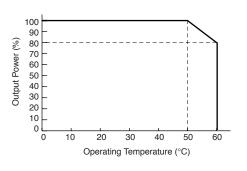

2. After turning off the input voltage, allow more than 10 seconds before turning on again.

#### **Precautions for Installation**

#### 1. Heat Dissipation by Convection

Keep minimum spacing of 50mm above and below, and 15mm on both sides to ensure proper ventilation.

#### 2. Applicable Wires, Ferrules and Tightening Torque

| Ferrule/<br>Wire | <b>□</b>    |              |             | <b>—</b>  |             |

# 3. Mounting on 35mm-wide DIN Rails

### Mounting

To mount the power supply on a DIN rail, place the input terminal side up and put the groove of the power supply on the DIN rail as shown. Press the power supply towards the DIN rail.

#### Removing

Insert a flat screwdriver into the slot in the clamp. While pulling out the clamp, turn the power supply bottom out.

### **Mounting Direction**

The AS-Interface power supply can be mounted on a vertical plane only. Other mounting directions are not allowed because of heat dissipation.

#### **Over Current Protection**

When an overcurrent of 110% of the rated output current flows due to an overload, the output voltage drops automatically and intermittent operation starts.

When the load returns to normal conditions, the normal output voltage is automatically restored. Prevent overload or short-circuitry for a long period of time, otherwise the internal elements will be damaged.

# **Overvoltage Protection**

When the output voltage exceeds 120% the rated output voltage, the output is turned off. When the output voltage is turned off due to an overvoltage, turn the input off, and after more than 10 seconds, turn the input on again.

#### **Undervoltage Protection**

When the output voltage drops below 95% the rated output voltage, the output is turned off. When the cause of the error is removed, normal output voltage is automatically restored.
