LIFTING MAGNETS

VERS-A-LIFT

POWERFUL, EASILY PORTABLE MODELS WITH OR WITHOUT BUILT-IN RECTIFIER.

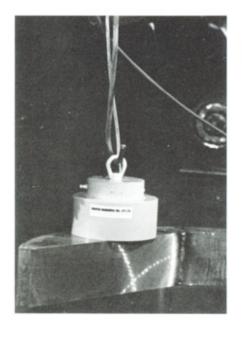

Powerful gripping force for their size. Ohio electro VERS-A-LIFT magnets are efficient, lift, hold and place material handlers throughout the industry. They're easily portable and extremely maneuverable. You'll use these light-weight magnets anywhere inside or outside your plant. Lifting capacities range from 350 to 6,320 lbs., in magnet diameters of 4,7,10,12, and 15 inches.

VERS-A-LIFT magnets are unusually versatile. Easily move small plates and castings, and also use them for small scrap handling.

Ideal material handlers for moving equipment. Carry your materials to any part of the plant with small cranes or fork lifts. VERS-A-LIFTS attach quickly and easily with their 1½ inch I.D. lifting ring.

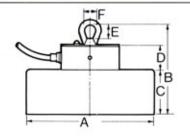

Long-sheet handling capabilities. VERS-A-LIFTS are used in multiples with spreader beams for lifting and placing long sheets that may otherwise flex or bow.

Adaptable to your power source. VERS-A-LIFTS are available in standard DC voltages or with built-in rectifiers. Separate rectifiers are also offered.

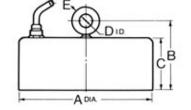

MODELS WITH BUILT-IN RECTIFIER (115 V.A.C. SINGLE PHASE, 60 HZ)

Size (Dia.)	В	С	D	E	F	G	Net Weight (Lbs.)
7"	811/16	47/16	21/4	11/2	11/4	3/8	38
10"	95%	45/8	27/8	13/4	11/2	1/2	87

LOADSTAR LIFTING MAGNETS

LS-X SERIES

- Production scrap handling magnets
- Extra heavy bottom plate design for large, dense scrap handling
- Heavy-duty cast case construction
- All models are deep field design
- 230 VDC standard
- Special voltages available

SUPER LOADSTAR

- Rugged, cast case construction
- Super field design
- Greater lifting capacity
- Increased duty-cycle for enhanced magnetic operation
- Cooler operating temperature for extended service life
