

ON GUARD

ON GUARD is a continuous level monitoring and leak detection system in a single control unit.

ON GUARD is compatible with a number of different level and leak detection sensors, and provides power for the sensors.

CONTINUOUS LEVEL MONITORING for two or three wire 4-20 ma. sensors

- Ultrasonic sensors for up to 40 feet.
- Alphasonic sensors for up to 12 feet.
- RF Capacitance sensors for up to 10 feet.

LEAK DETECTION SENSORS for single point leak detection are available in Polypropylene, PVDF, or PFA Teflon

- Ultrasonic Gap
- RF Capacitance
- Optic
- Buoyancy

ON GUARD is available with multiple options.

Local audible and visual indicators, and acknowledge buttons
Dry output contacts for alarm functions
RS 422/485 output to computer systems
Software available for calibration, communication, and logging

ON GUARD is available with sensors for a complete system, or separately for use with customer supplied sensors. Units are pre-calibrated, programmed, and full function tested.
